Tailored solutions for power, IoT and embedded systems

SAVE UP TO 30%

POWER SUPPLY INTEGRATION AND DESIGN BUNDLE

Gain new insight into power supplies

- Up to 4 analog measurement channels
- Our most versatile TekVPI Current Probe
- Power Measurement and Analysis Application Module

Buy any **MDO3000** or **MDO4000C** Oscilloscope configured for power supply analysis, with a 30 Amp AC/DC current probe and software for making automated power measurements.

STARTING AT $6,100

SAVE UP TO 28%

EMBEDDED DESIGN BUNDLE

Get visibility into your entire system for a price you have never seen before

- Up to 4 analog measurement channels
- 16 digital measurement channels
- Decoding and Triggering for I²C, SPI, USB, RS-232, and many more

Buy any **MDO3000** or **MDO4000C** Oscilloscope configured for debugging embedded designs, with digital channels and all available applications software.

STARTING AT $5,675

SAVE UP TO 23%

WIRELESS EMBEDDED SYSTEMS / IoT BUNDLE

Get end–to–end system visibility from sensor to transmitter

- Up to 4 analog measurement channels
- 3 or 6 GHz RF Spectrum Analyzer Channel
- Arbitrary/Function generator output
- 16 digital channels
- Decoding and Triggering for I²C, SPI, USB, RS-232, and many more

Buy any **MDO3000** or **MDO4000C** Oscilloscope configured for wireless system design, with a spectrum analyzer option, a function generator output, digital channels, and all available applications software.

STARTING AT $8,625
